

Advanced Astrology

...for Beginners

An Intensive Course over Four Consecutive Sundays:

25th July, 1st, 8th & 15th August 2010

This intensive introduction to the world of astrology will leave you well equipped to carry on exploring the subject on your own with confidence. Although general principles of chart interpretation will be covered, the most important skill that participants will master in this course is the ability to calculate and interpret Transits (astrological life cycles) in great detail. Simply observing over time how Transits work will suffice to give a person deep insight into astrology, life and people- guaranteed!

You will furthermore be introduced to the true laws of astrological relationship compatibility, and more specifically the way the inherent dynamics between two (or more) people are rhythmically triggered by Transits. This can in itself lead to a whole new appreciation of what's really going on in your personal relationships.

You will learn practical and applicable skills, not vague abstractions. Any participant who makes an effort to follow and apply the information and techniques presented will learn to do astrology that really works!

Anyone can enroll, and the techniques taught can be a very effective way of exploring your own personal patterns and psychological tendencies. Healers and therapists who are interested in adding astrology to their repertoire of diagnostic skills may find this the ideal inroad into the potentially formidable maze of astrology's technicalities, and are warmly invited to join.

“Life is bewildering movie in a foreign language- astrology provides the subtitles!”

Among the topics covered in the course:

- the planetary family of the Solar System- their cycles and attributes
- the structure of a birth chart
- the structure of the zodiac: elements, crosses, polarity, etc.
- symbolism of the zodiac depicting archetypal developmental processes and personality types
- the correspondence between the signs of the zodiac and the houses
- Aspects (geometric connections between planets) as a core technique of western chart interpretation
- identifying key configurations
- approximating the Ascendant- introduction to the Houses of the birth chart
- calculating a Natal Chart using the free astrological software: astrolog 5.40 and other free resources
- introduction to Transits (a fundamental technique of astrological prediction and life-cycles)
- Transits as triggers to natal (birth) “complexes”
- short term triggers to longer term processes- the interweaving of cycles
- introduction to Synastry (interpersonal relationship astrology)
- Transits as triggers to inherent relationship and group dynamics
- dials and graphs for analyzing masses of data
- exciting case studies- the Dalai Lama, Barack Obama, Frida Kahlo, and other interesting people...

Each lesson will begin at 10:00am and end at 3:30pm

The Venue: Knysna Wellness Centre, 39 Fichat st., Knysna

Course Fee: R1000

This includes:

- snacks and refreshments
- course notes and a CD copy of a comprehensive textbook on chart interpretation by Richard Fidler
- assistance accessing the free astrological software **astrolog 5.40**
- a “user guide” for astrolog 5.40, as well as time zone reference for chart calculation
- tables (ephemeris) for calculating Transits
- an audio recording will be made of the entire course and each participant will be given a copy on a CD, so the whole course can be revisited as often as required!
